LAB MANUAL 02

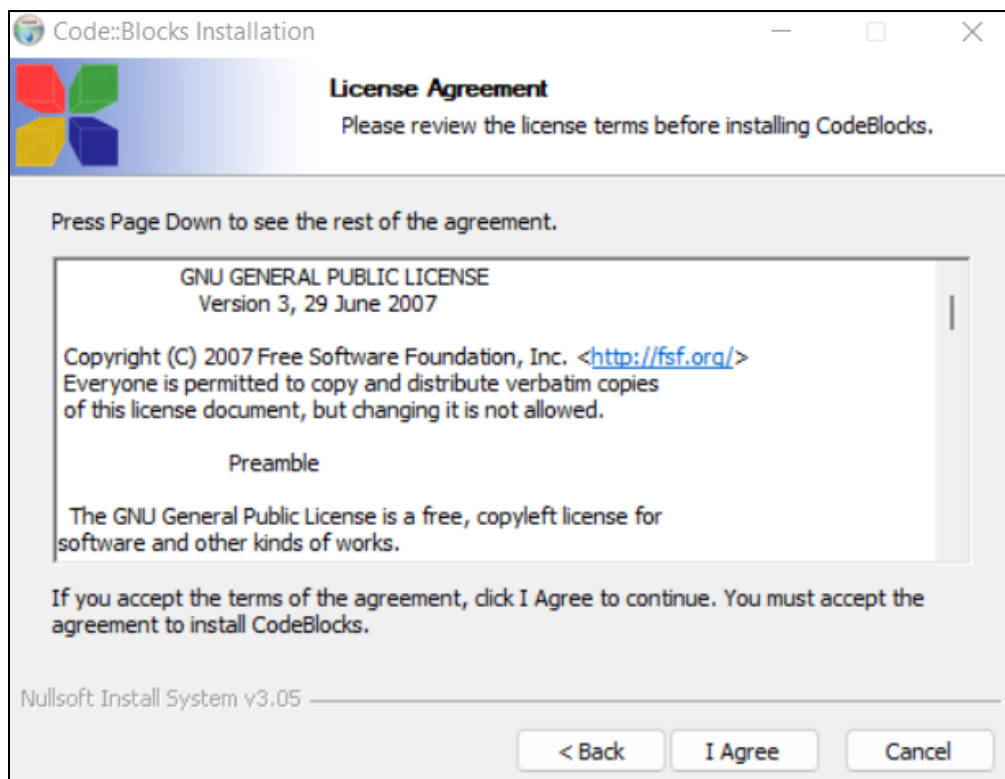

INSTALLATION MANUAL FOR
CODEBLOCKS

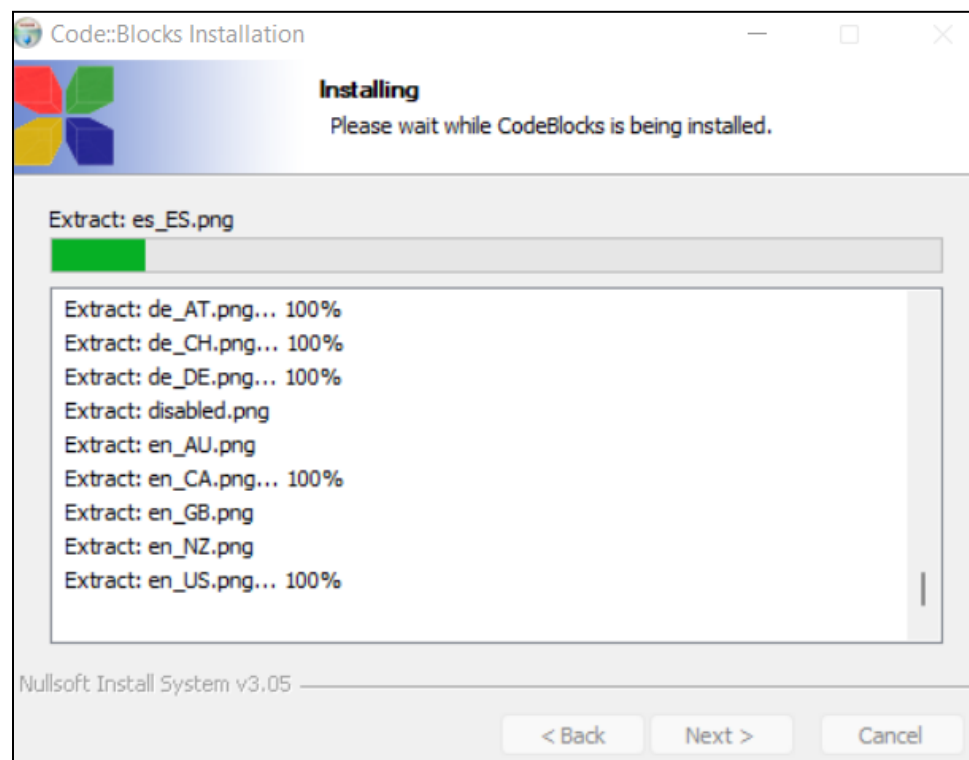

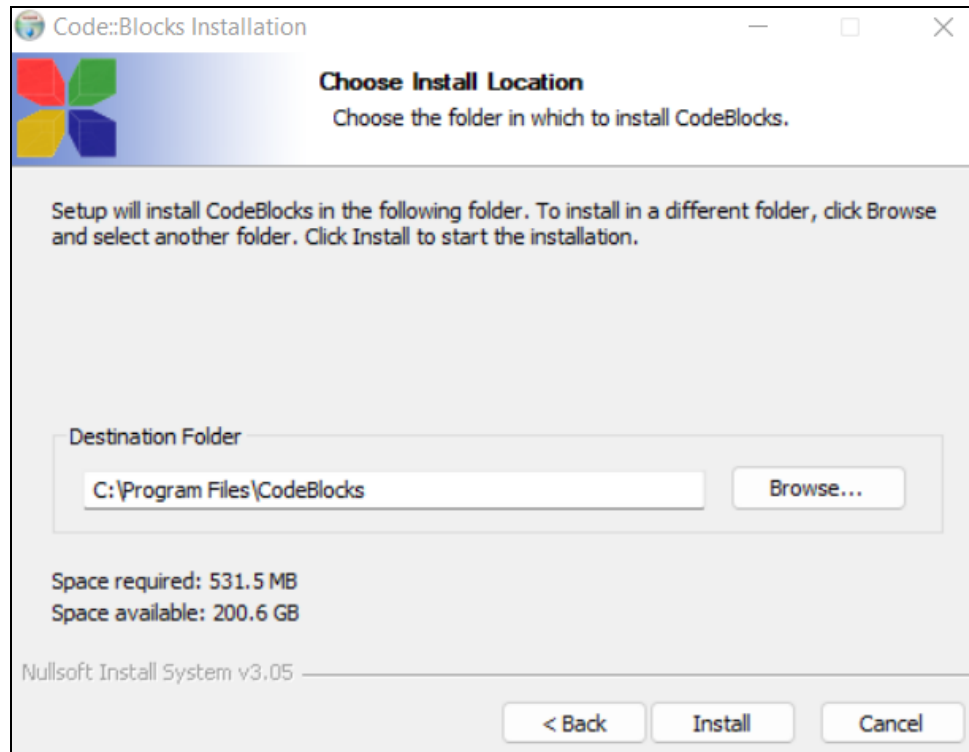

INSTALLATION MANUAL FOR CODEBLOCKS

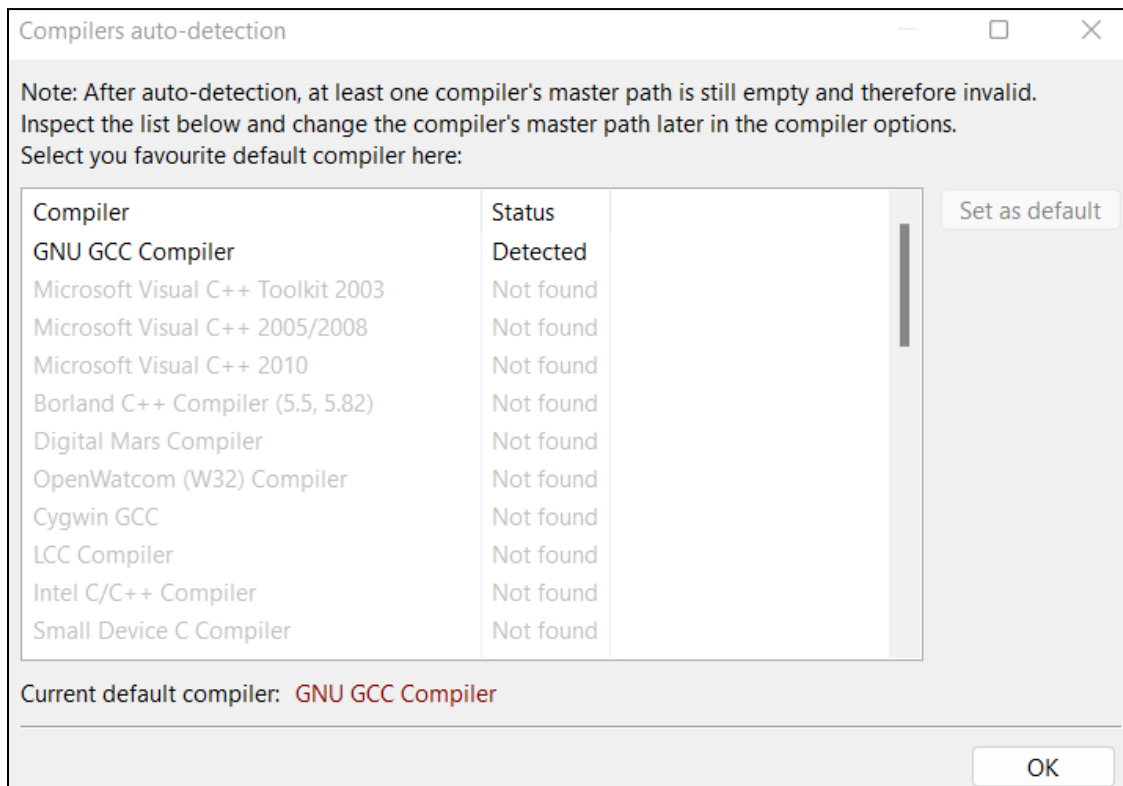

1. Downloading from the Internet:

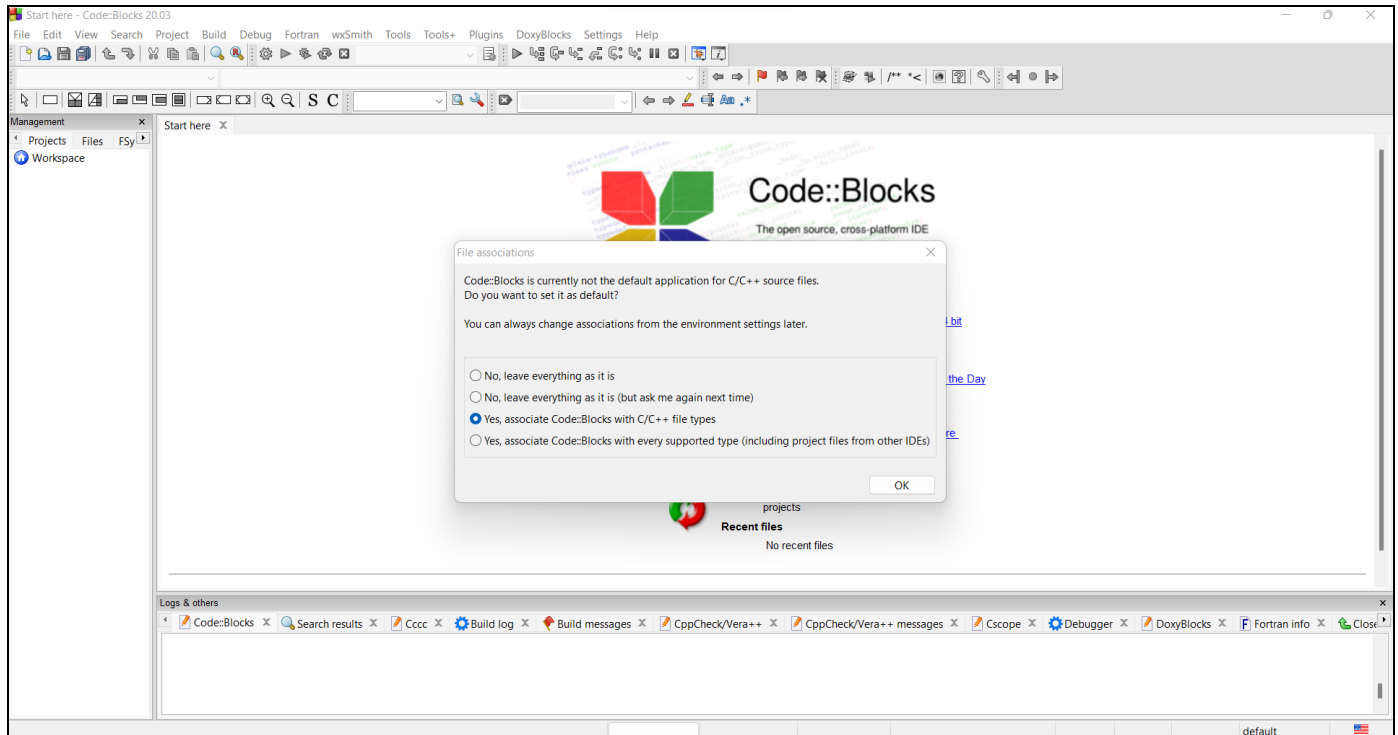

- Go to the following link to download the setup file for CodeBlocks.
- <https://www.fosshub.com/Code-Blocks.html?dwl=codeblocks-20.03mingw-setup.exe>
- After successfully downloading the file, run it to start the installation wizard.
- Some step by step screenshots are given below.

2. Installing CodeBlocks:

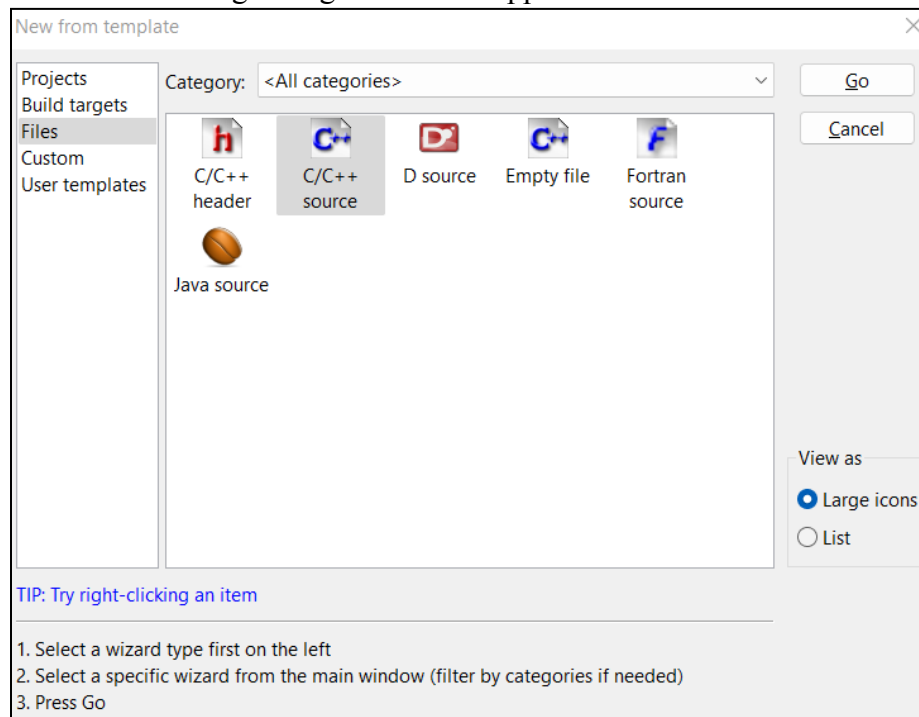

3. Creating a C File:

- Click on File>New>File..
- The following dialog box should appear.

- Select “C/C++ Source” and click “Go”.

- Select C from the above Window and click Next.

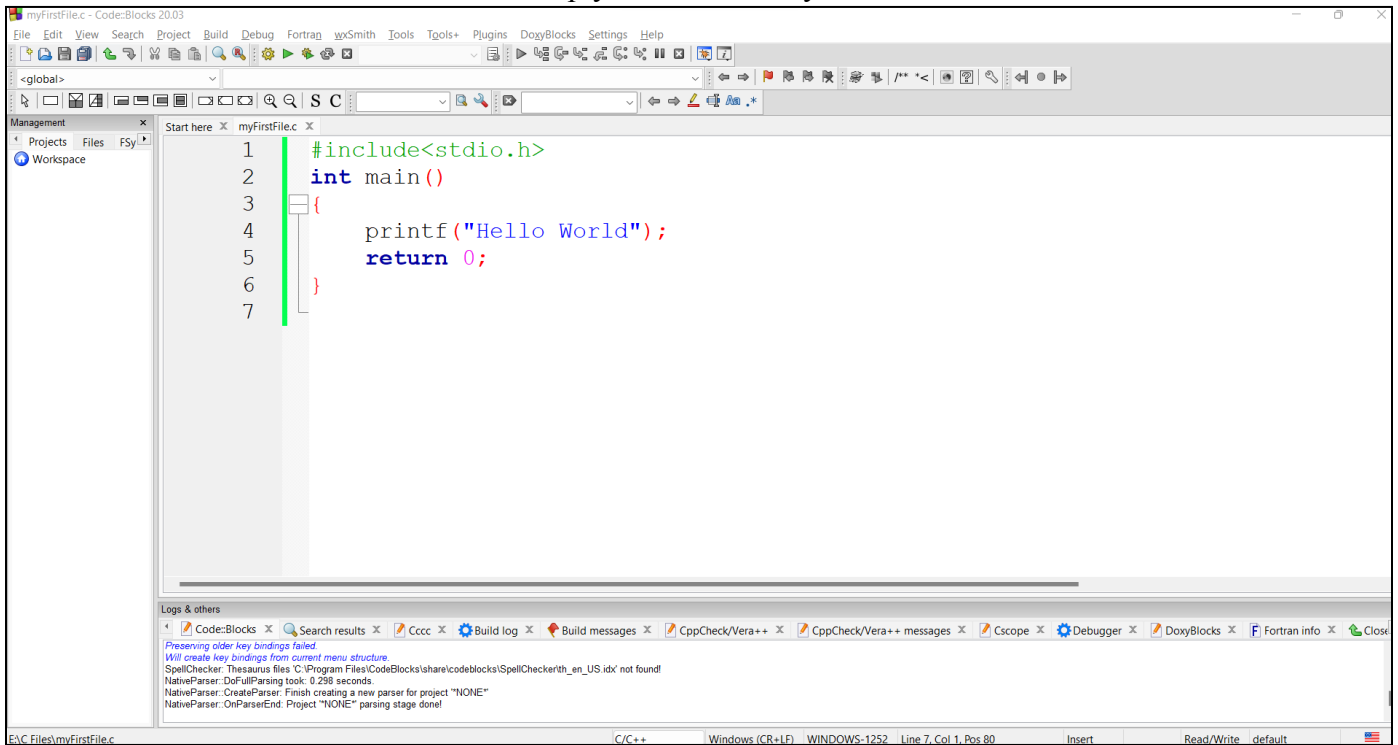

- Click on the three dot button next to the field named “Filename with full path”.
- Select a file location i.e. any folder and name your file.
- Then Click on Save, the “Filename with full path” field will automatically fill.

- Click on Finish.

- You should see an empty C file to write your code on.

4. Compiling the File:

- Click on the “Gear” button under the toolbar menu as represented follows:

5. Executing the File:

- If no errors occur, the file can be executed using the green “Play” button.

- You can achieve both compilation and execution with the button highlighted below:

6. Execution of File:

Lab Task 02:

1. **Install CodeBlocks on your personal Computers. All future lab tasks and assignments will be made on CodeBlocks.**
2. **If you encounter any error, you are free to consult this manual and your classmates.**
3. **You are required to achieve this task before the start of the next lab.**
